

Brava Old World Slate Roofing System

Layout & Accessory Guide

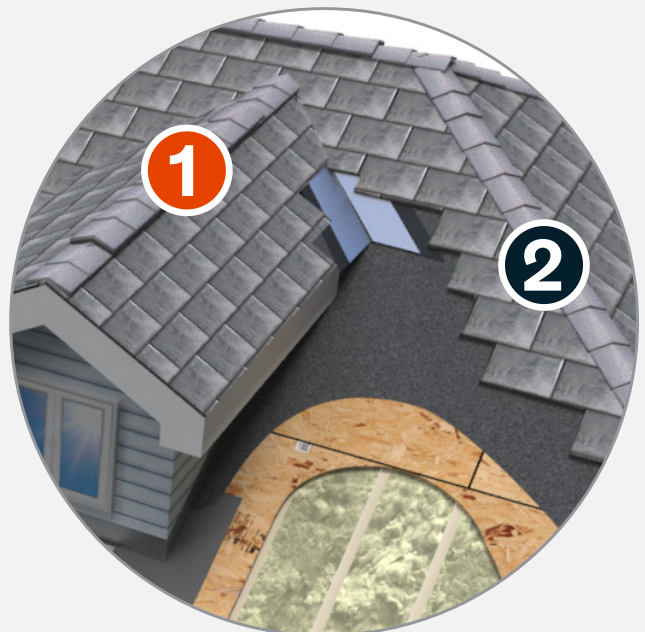

Hip & Ridge

Follow the chart below to determine correct hip and ridge cap for the slope of your project installation.

Low (160°) – Steep (90°)

① Ridge Cap

Low: 4:12 or lower
Standard: 5:12 – 10:12
Steep: 11:12 or higher

② Hip Cap

Low: 5:12 or lower
Standard: 6:12 – 14:12
Steep: 15:12 or higher

Note: Recommendations are for symmetrical Hip/Ridge only. For example, a 5:12 slope meeting a 5:12 slope. Calculate angle for asymmetric Hip/Ridge, or contact Brava Technical Support. For example, a 5:12 slope meeting an 11:12 slope.
